PERSONAL DETAILS

14/12/2001

UNMARRIED

ETHIOPIAN

LANGUAGE

ENGLISH, AMHARIC

OBJECTIVE

I'm a passionate and detail-oriented Full Stack Web Developer with a strong focus on Python and Django for backend development, and proficiency in HTML, CSS, JavaScript, and modern frontend tools for building responsive and dynamic user interfaces. Over the past few years, I've built a range of projects—from RESTFUL APIs and admin dashboards to fully functional web applications. My strength lies in building scalable, secure, and maintainable applications, integrating third-party services like Stripe, Firebase, and social login, and optimizing backend logic for performance.

EDUCATION

DebreMarkos University 10/06/2026

Bsc. Software Engineering

EXPERIENCE

WEB DEVELOPER 07/08/2023 - 07/04/2024

DebreMarkos University

Developed and optimized a Django REST API to fetch course details from the database, improving performance by 30%.

Collaborated with a team to enhance the backend architecture, ensuring scalability and efficiency.

Integrated the API with the frontend for seamless data retrieval and dynamic course presentation.

Worked with PostgreSQL to optimize queries and reduce response time.

FREELANCE DEVELOPER 07/08/2024 - Present

Various

Developed web applications using Vue.js, Django, and PostgreSQL for various clients.

SKILLS

Python

Django

Html/Css

Postgres

Vue.js

Git/Github

PROJECT

Social Media

Created a simple social media site using Django; the site has a unique python algorithm to calculate peoples astrology sign based on Ethiopian tradition.

Bajaj Application

Developed an Android application called Bajaj to solve transport issues in areas; the application job was to list nearby drivers by fetching locations and also used as contact book of drivers.

Dynamic Portfolio

Customized responsive portfolio to be dynamic and interactive by using Django DRF to fetch data from postgres database and customized frontend using vue.js.
