Portfolio: <https://niguslibe.vercel.app> | Location: Debre Markos, Ethiopia

PROFESSIONAL SUMMARY

Fullstack Developer specializing in Django, Python, Vue.js, and PostgreSQL, with hands-on experience building scalable web applications, REST APIs, and native Android apps. Skilled in real-time systems (WebSockets, Redis), admin dashboards, third-party integrations, and production deployment. Focused on clean architecture, performance, and delivering reliable digital products from backend to mobile.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Django, Django REST Framework, HTML/CSS, JavaScript, Vue.js, Android (Kotlin/Java)
- **Databases & Tools:** PostgreSQL, Redis, Git & GitHub, Docker
- **Development & Architecture:** REST API, WebSockets, CI/CD, JWT, ORM, Admin Dashboards, Atomic Transactions

SOFT SKILLS

- Team Collaboration, Communication, Problem Solving, Time Management

LANGUAGES

- English (Fluent)
- Amharic (Native)

EDUCATION

Debre Markos University — BSc in Software Engineering

2021 – 2026

Coursework in SDLC, software testing & QA, security, and networking.

5 Million Ethiopian Coders Bootcamp — ML & Android Development

2025

Machine learning and Android development with practical implementation on web and mobile platforms.

TDD with Django Bootcamp — Fullstack Development

2024 – 2025

Test-driven development, DRY, SOLID principles applied in real-world Django projects.

EXPERIENCE

Freelance Fullstack Developer

February 2024 – Present

- Built web applications with Vue.js, Django, and PostgreSQL for multiple clients.
- Collaborated with a team of 5 developers to integrate a payment gateway and build an admin dashboard for user and subscription management on a SaaS platform.
- Developed and shipped production Android apps and REST API backends with admin tooling.

Web Developer — Debre Markos University

August 2023 – February 2024

- Developed and optimized Django REST APIs for university platforms, reducing grade lookup response time from 15s to under 4s and enabling online registration and result access.

PROJECTS

MarkosGo — Ride Hailing Android App

- Ride-hailing Android app tailored for Debre Markos city and airport routes, featuring ride appointments, atomic transactions, automatic pricing, live driver tracking, and a reliable Django backend.
- Available on Google Play: <https://play.google.com/store/apps/details?id=com.digitalmarkos.bajaj>

Go Bingo — Multiplayer Fullstack App

- Real-time multiplayer bingo platform built with Django, Vue.js, and PostgreSQL, using WebSockets and Redis for low-latency gameplay and session management.
- Live on Telegram: https://t.me/goo_bingo_bot

Admin Dashboards — Go Bingo & MarkosGo

- Built REST API-powered admin dashboards for both projects to manage users, rides, games, and application data — enabling monitoring, updates, and operational control from a single interface.
